

Andrew Dimes

Full Stack Software Engineer and Web Developer

(407) 223-8991 | andrewdimes@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Resourceful and detail-driven developer with excellent communication skills and a strong foundation in collaborative environments. Extensive background in customer service and management with over 8 years experience in high volume restaurants. Highly adaptable and capable of working under pressure.

TECHNICAL SKILLS

HTML & CSS, JavaScript & jQuery, React, Node.js & Express, MongoDB, Mongoose, Python & Django.

PROJECTS

Local Bar & Grill

- Built a web application designed around the clients needs to help showcase the restaurant.
- Designed a custom website with the tools necessary for customers to order food.
- Implemented OAuth for login capabilities.
- Designed a review page for customers to leave reviews.

Fanime

- I worked with a team of two other junior developers to produce a website capable of registering users and providing them with the ability to browse through a collection of over 10,000 anime, perform searches, upload avatars, as well as favorite anime or add anime to their watch list .
- I was responsible for setting up and maintaining our code for use with the Kitsu API, I also set up and maintained our database, and built a responsive design that could be enjoyed across all screens.

Checkers

- Developed a fully functional web based game.
- Incorporated the fundamentals of HTML, CSS, and JavaScript.

EXPERIENCE

Software Immersive Apprentice | General Assembly | Remote *February 8th, 2021 - May 3rd, 2021*

- Implemented Agile / Scrum framework to develop code projects and assignments with a diverse team of engineers.
- Intensive 500+ hour course utilizing GitHub and pair programming for debugging, rapid prototyping, and version control
